

Reheating Instructions

All items are fully cooked. Unless otherwise noted, reheat all foods until internal temperature reaches 165°F. Check internal temperature with a cooking thermometer inserted into thickest part of the food (without touching the bone in meats). Reheating times may vary based on oven type, accuracy of oven temperature, container size, type and quantity of food, or other variables.

Entrées

All entrées are fully cooked and should be removed from packaging and transferred to an oven-safe baking dish or roasting pan before reheating in the oven.
